

Appln. No. 10/733,957
Response to Office Action dated Mar. 9, 2005
Amendment dated June 8, 2005

REMARKS/ARGUMENTS

Entry of this amendment and reconsideration of the present application are respectfully requested.

Claims 60, 62, 64-68 and new claims 69-73 are pending in this application, claims 1-59, 61 and 63 having been cancelled.

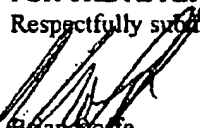

Changes to claims 60, 65 and 66 are discussed in a previously filed Amendment Under 37 C.F.R. §1.116, which, as per an Advisory Action dated June 1, 2005, will be entered for the purposes of appeal.

In this second Amendment Under 37 C.F.R. §1.116, new dependent claims 69-73 are presented. The subject matter of these claims, a specific recitation of the airbag or occupant restraint device being controlled based at least in part of the measured pressure in the chamber of the bladder, was previously set forth in the claims submitted in a Preliminary Amendment dated July 15, 2004 and considered by the Examiner for an Office Action dated November 3, 2004. Thus, no new issues are raised by the presentation of claims 69-73.

Claims 69-73 are now presented as it is desired to proceed with an appeal of this application in which the issue of the support for the feature of an airbag being controlled based on the measured pressure in a chamber of a bladder is also brought before the Board of Patent Appeals and Interferences for its review.

An early and favorable action on entry of this Amendment Under 37 C.F.R. §1.116 is earnestly solicited. The Examiner is respectfully requested to contact the undersigned if any formality is required to enter this Amendment Under 37 C.F.R. §1.116.

FOR THE APPLICANTS
Respectfully submitted,

Brian Roffe
